

Create a project called Daily23. Add a C source file to the project named daily23.c.

Write a program that opens a file called words.txt for reading. Your program should read the entire file character by character and print it to the screen except that the output to the screen should make every lower case letter into its capital version.

At the top of your program you should have a comment section that follows the below format:

```
/******  
    Author: <insert your name>  
    Date: 11/7/2014  
  
    Purpose: <Insert a short description of what  
              your program does here.>  
    Time Spent: <Insert how much time you spent  
                on the assignment here>  
*****/
```
