COMP 3050-201 Computer Architecture
Monday night section
Assignment Submit Details
Spring 2018

• **All** of your submissions must include a minimum of **four** separate files:

- **File 1:** A short **write-up** that **first** specifies what you think your **degree of success** with a project is (**from 0% to 100%**), followed by a brief discussion of your approach to the project along with a **detailed description** of any problems that you were **not** able to resolve for this project. **Failure to specifically provide this information will result in a 0 grade** on your assignment. If you do **not disclose** problems in your write-up and problems are detected when your program is tested, you will receive a grade of 0. **Make sure that you include your email address in your write-up so that the corrector can email you your grade.**

- **File(s) 2(a, b, c, …)**: Your **complete source code**, in one or more **.c** and/or **.h** files

- **File 3**: A **make file** to build your assignment. This file must be named **Makefile**.

- **File 4:** A file that includes your **resulting output** run(s) from your project. This is a simple text file that shows your output, but make sure that you annotate it so that it is self-descriptive and that all detailed output is well identified.

• The submit syntax issued from a shell prompt for your first assignment is:
> **submit   smohanty   hw1s1   <directory_of_the_files>**

> where **<your_directory>** is the name of the directory with exactly your required submission files in it. The directory name must include your name, your student ID and will vary from: **lastname_firstname_SID_hw1, lastname_firstname_SID_hw2 ... lastname_firstname_SID_hw7.** For each succeeding assignment, substitute **hw2, hw3**, etc. for hw1 both in your directory name and in the **submit command** (e.g., for hw2, it will be:
> **submit   smohanty   hw2s1   <directory_of_the_files>**

> Our team of Shruti Mohanty (Shruti_Mohanty@student.uml.edu), Vivek Burra (SaiSantoshVivekBharadwaj_Burra@student.uml.edu), and Ryan Vavruska (Ryan_Vavruska@student.uml.edu) will correct the assignments in the submission queue. (If you don't submit to the right queue as specified above, you can't get credit for your assignment. If you aren't familiar with submit, there is a man page on the system (i.e. man submit). Beyond that, contact the Shruti, Vivek, or Ryan for help.)

> One of them will email you your grade and any details about points you may have lost on each assignment. **It is very important to make sure that you include your email address in the write-up portion of your submission, so they can return your grade to you.**

- Assignments are **graded** from **0 – 10 in half point (0.5) increments**, and, as outlined in the class syllabus, will **lose 2 points for each week they are late up (the first point for up to three days late, and the second point after that in a given week) for a total of 5 late points. The latest assignments will be accepted will be two weeks late (less than that for the last two assignments). The 11:59 deadlines are strict. After that, the submission queues shut down.**
